

Screen Features

- 1/4" (no weld) sideplates
- 18-degree mount angle
- Compact vibrating unit with self-aligning high-capacity spherical roller bearings
- Vibrating unit drive shaft protected by cylindrical tube
- Grease lubrication of vibrating unit bearings is standard
- Crowned support frame
- Tubular deck design: screen decks are fabricated using rectangular tubing, yielding a rugged construction
- Exterior access to counterweights eases weight changes
- Screen support frames joined to the vibrating frame with high-strength vibration proof hardware
- Replaceable cross braces ease maintenance and prolong screen life
- Heavy-duty support base supplied
- Side tension media: side tension media accepts wire cloth, side tension urethane or rubber media
- Reinforcing plates at vibrator
- Bolt on 1/4" AR lined feedbox
- Backplate with rubber dust curtain
- Support pedestals and springs
- Steel coil springs
- FEA design with extensive stress analysis
- Operation and maintenance manuals

Optional Equipment

- Standard wire cloth
- Spring guards – rubber wrap around
- V-belt drive and guards
- Electric motor
- Side Discharge (RH or LH)
- Open Feedbox
- Deck Selector Feedbox
- Deck Selector Feedbox with Screen Bypass

Feature	Specification
Stroke Length (Throw) *	Min. 1/4" to 7/16"
Operating Speed Range	780 – 1050 RPM
Slope Range	18°
Maximum Feed Size **	5"
Maximum Top Deck Opening	2 1/2" (wire cloth)
Minimum Screen Cloth Opening	16 mesh – 3/32"
Sideplate Thickness	1/4"
Feed Box Liner Thickness (AR400 Plate)	1/4"

Support Frame Standards

Valu-King®			
Screen Width Feet (Meters)	4 (1.2)	5 (1.5)	6 (1.8)
Crown	Single	Single	Single
Wire Cloth Width * inches (cm)	47 (119)	59 (150)	71 (180)
Wire Cloth Pieces to Cover Width	1	1	1
Wire Cloth Hook Direction	Both Facing Up	Both Facing Up	Both Facing Up
Center Hold Down	None	None	None

* Wire cloth width dimensions to outside of hooks

*Live weight includes live body, feed box, discharge lips and counter weights. Total weight includes live weight plus sub-frame, springs, pivoting motor base, drive and guard (electric motor not included).

**Maximum TPH carrying capacity is defined as the total feed (TPH) to the screen minus the bottom deck thru's (TPH).
